Summary : Highly Motivated Software Engineer with a solid foundation in software development and a Bachelor's degree in Engineering. Experienced in writing unit tests, solving technical challenges, and collaborating in agile, cross-functional teams. Proficient in TypeScript/Node.js, and familiar with cloud platforms, databases, and debugging techniques. Quick learner with a passion for applying best practices in software design and development. Eager to contribute to innovative projects and grow within a global team.

Technical Skills

- **Frontend** - JavaScript, React Js, Redux, Nextjs, TypeScript
- **Backend** - Node.js, Express.js, TypeScript, Java
- **Tools & Technologies** - API development, Postman, JSON
- **DevOps** - AWS, DigitalOcean
- **Database** - mySql, MongoDB, PostgreSQL

WORK EXPERIENCE

Nudge Lab, Bangalore, India - (Remote)

Jan 2025 – Present

Frontend Engineer

- Improved my ability to create quick, server-side rendered applications by using Next.js to create a dynamic, user-friendly application.
- Collaborated with the team to develop the **AI product Gistr**, utilising Next.js features like server-side rendering and static site generation.
- Helped implement the **CI/CD pipeline** to ensure a smooth development-to-production workflow by expediting the deployment process.
- Streamlined development and managed several related projects while working with **Monorepo Architecture**.
- **PostHog** was integrated to track user interactions, collect product statistics, and obtain insightful data about app performance and user behaviour.

Skills Learnt: Next.js, React, Server-Side Rendering, Static Site Generation, API Routes, Responsive Design, Time Management, Project Planning, PostHog Analytics, CI/CD Implementation, Monorepo Architecture.

Payoll Payments LLC, Dubai, UAE - (Remote)

Sep 2024 – Jan 2025

Intern

- Worked on a full-stack application for **Payoll API**, a business-to-business payment service that streamlines business payment processing by integrating several billers into a single platform.
- Contributed to the creation of **Ared**, an **AI-powered** carbon footprint calculator intended to evaluate emissions from both individuals and businesses and encourage environmental initiatives.
- Assisted in the integration of **carbon offset projects** and the **carbon credit marketplace**, allowing users to purchase certified carbon credits and reduce their environmental impact, using **Nest.js** and **VITE**,

Skills Learnt: Full-Stack Development, Nest.js, VITE, API Integration, Carbon Footprint Calculator, Carbon Credit Marketplace, Environmental Impact Solutions, Time Management, Project Planning.

Freelance, Remote

Sep 2018 – Mar 2019

Wordpress Developer

- Developed multiple e-commerce websites using WordPress CMS.
- Implemented responsive design to ensure compatibility across various devices and browsers.
- Optimised websites for SEO and performance, resulting in higher search engine rankings and faster load times.
- Leveraged WooCommerce to build robust online stores, integrating payment gateways and shipping modules.

Skills Learnt: Host Deployment, Understanding of DNS, Responsiveness of Websites.

PROJECTS

[\[Link\]](#) Personal Portfolio Website

August 2023 – September 2023

Tech Stack: React JS, Next JS, HTML-5

- Developed a personal portfolio website using Next JS showcasing various projects and skills.
- Integrated a contact form with email functionality, allowing visitors to reach out directly through the website.
- Added project showcase sections with detailed descriptions and links to live demos and source code.

[\[Link\]](#) Full Stack Web Application for College

April 2024 – June 2024

Tech Stack: React JS, Next JS, MongoDB, TailwindCSS, Node JS, Express JS, JWT, Stripe, Multer, DigitalOcean

- Leveraged Next.js for server-side rendering and optimized performance, enhancing the user experience and SEO.
- Implemented JWT for authentication and authorization, enhancing security protocols within the application.
- Utilised Multer for handling file uploads, ensuring efficient management of user-generated content.
- Integrated Stripe for payment processing, ensuring secure and efficient transactions for users.
- Implemented the Paper Wizard functionality using the OpenAI API, thoroughly tested it with Postman during the development phase to ensure optimal performance and reliability.

[\[Link\]](#) Chat With PDF

June 2024 – July 2024

Tech Stack: Next JS, React JS, Pinecone, Langchain, Stripe

- Developed a SaaS application using Next.js for interacting with PDF documents via chat.
- Integrated Langchain for natural language processing and model chaining.
- Implemented Pinecone vector store for efficient document search and retrieval.
- Used OpenAI GPT to generate responses based on PDF content.
- Integrated Clerk for secure user authentication.

EDUCATION

Govt. College of Engineering & Technology, Safapora, India

2019-2024

B.Tech | Major: Computer Science & Engineering | Overall: 7.49
